

ANNA CIBIS

infrastructure engineer

PROFILE

During my professional journey I had a chance to work with several different technologies, but I was always devoted to Linux and Linux-related solutions. I'm also a coding enthusiast, data scientist wanna-be, data analytics student and, what is most important, an experienced and very ambitious IT engineer with 5 years overall experience (now working with Hadoop). I would say I'm a positive and enthusiastic person - and I relish a challenge.

LANGUAGE SKILLS

Polish - native

English - fluent, written and verbal

French - fluent, written and verbal

Spanish - basic

SKILLS

Linux

Hadoop

Programming

Network research

HOBBIES

EXPERIENCE

Senior Infrastructure Engineer (Hadoop)
(Capgemini Poland)

since 11.2015

Maintaining Hortonworks and Pivotal HDB infrastructure, providing Big Data Lake as a Service engineering support. From the technical standpoint I work / I am experienced with:

- Pivotal and Hortonworks Hadoop platforms deployment, configuration, tuning and troubleshooting (secured and not secured clusters).
- Deploying, configuring and managing various software that interacts with Hadoop environments like Talend, Informatica, Qlik, NiFi etc.
- EMC Isilon NAS acting as DFS

I have basic programming skills that are needed in my daily job, also I have some programming skills developed as a hobby. This includes writing code in Python, bash, JavaScript and R.

Infrastructure Engineer (Linux&Virtualization) 05.2014 – 11.2015
(Capgemini Poland)

Implementation and maintenance of VDI (Virtual Desktop Infrastructure) solutions for Capgemini IS in Poland (Citrix: XenApp, XenDesktop, XenServer, NetScaler), planning changes. Also, introducing new solutions based on open source software and non-standard hardware (Raspberry PI). Taking part in project providing cloud services based on opensource software such as OpenStack, Puppet, Zarafa.

Infrastructure Engineer (O365) 04.2013 – 05.2014
(Capgemini Poland)

Junior Infrastructure Engineer (Linux) 11.2012 – 03.2013
(SteriaPoland)

Maintaining Linux servers infrastructure, tuning performance and ensuring high availability, developing infrastructure monitoring tools, installing, configuring, and maintaining services such as Bind, Apache, MySQL, dnsmasq. Executing basic tasks as disks cleanup, LVMs creation, process checking.

EDUCATION

Master's Degree in Big Data Analytics
University of Economics in Katowice

october 2016 till now

Bachelor Degree in Information Technology
Institute of Information Technologies (WSTI)

2009 - 2013

Bilingual French-Polish High School
finished with the certificate of French Council

2005 - 2008
